**J. H. ZEILIN & CO., Philadelphia, Pa.****BUYING PICTURES.**

A REPORTER CHATS WITH SEVERAL WELL KNOWN ARTISTS.

The Painters Pretty Generally Agree That One Should Buy the Paintings Which Please His Judgment Is Capable of Criticism and Will Improve.

"How do people buy pictures?" Colin Campbell Cooper repeated. "Well, I suppose the majority of collectors consult the advice of a dealer or some artist, and yet there are those, not pretensions to connoisseurship, either, that know a good thing when they see it, and evince unusual wisdom in their purchases. To some, however, self reliance in investing on a large scale in paintings has proved rather a disastrous experiment. The other day a collection made by a man thirty or forty years ago was sold. There was hardly half a dozen good things in it, simply because he bought and he did not know what he was getting."

"Art in this country is gradually waking up. Perhaps the Centennial might be called the American Renaissance. We know infinitely more about art than our grandparents did, and with opportunities increasing from year to year it is fair to suppose our children will show a still more marked improvement in taste. Greater facilities for traveling have done much to bring about a change in our little world, and the tendency of our art is rather toward the cosmopolitan than provincial. Naturally, time is required to educate the public taste along artistic lines."

"I think people will buy more pictures when they understand painting is not an accomplishment merely a pleasure to the eye, but that it is a part of education, of civilization. It will require time to realize this. Exhibitions are rife and the majority like to look at pictures with an admiration rather than an understanding. When the picture is out of sight the impression is gone. With general diffusion of art paintings will be bought not solely because they appeal to the senses, to personality, but for their artistic qualities; not simply because the subject illustrated is rather a pretty idea, but because the work is technically a good art production."

Stephen Ferris said: "The world is full of good pictures to be bought for reasonable prices, but unfortunately many thousands of dollars, many fortunes, are spent for nonsense, while good work remains unsought and unbought. Common sense is happy capital in picture buying as in any other business. One can hardly provide a set number of rules to be observed in buying. Many books have been written on military science, yet the world has seen comparatively few fine generals. Judgment rules the world, and the world is full of good pictures to be bought for reasonable prices."

Thomas Eakins would like to have people buy pictures that please them and appeal to their taste. "The majority are afraid to buy what they like; they must have some one else's advice. Well, if they start with bad art, perhaps before long they will come to the good. Let people buy what they want. 'I have not thought much about buying pictures,' said Mr. Frederick Waugh. "We artists are more chiefly concerned in trying to sell them. It is the privilege of the artist to paint pictures which appeal to people; which they understand and want to have for their own. But he should have a high standard, and he cannot succeed if he lowers it to cater to the popular taste. He is fortunate if in working out his ideas he pleases the public and yet does not lose his independence nor forfeit his originality. His work may be appreciated by large numbers, but it is always certain that some few will recognize his endeavor and will want to buy it."

"In the Old World art is accessible to all. The Luxembourg and the Louvre are filled permanently with the masterpieces of all ages, the best that have been done. There, too, the spirit of union is strong among artists. They gather together and talk of everything pertaining to the art world, consequently they live entirely in a congenial climate and they grow and develop in an essentially art atmosphere. Impressionism? Yes, this is the great word nowadays. Many have an idea that it is a synonym for vaguely treated and partially unfinished pictures. Impressionism claims to record facts as observed by the artist. Sincerity to nature is its aim. After all, there is nothing so beautiful as truth, and the nearer we get to it, as we find it in nature, the better artists we are."

"Many Americans buy pictures," Mr. F. de B. Richards responded, "because they have accumulated money, and pictures are the proper thing to have. Generally they know very little about it, and a dealer does the work for them. If people purchase pictures to flatter their vanity, let them spend big sums and buy high priced pictures. If they buy for pleasure, let them buy what interests them. I remember meeting Edwin Forrest after a sale. 'I've bought a picture,' said he. 'They told me not to do it, because very likely it is not original. But it pleases me, and I should buy it if it were by somebody I never heard tell of.' A picture pleasing to the eye is a source of education for the time being at least. Adverse criticism may lead a man to scrutinize it and study it more closely than if he had bought one he did not like half so well."

"I think I should be inclined to buy what I liked personally," was the opinion of Edwin Swift Balch, "not forgetting that the pictorial qualities should not be lost sight of in the desire to get a pleasing subject. Good handling, the proper placing of values and meritorious color, allied to a sympathetic subject, will tend to keep our interest in a painting alive."—Philadelphia Times.

The oldest mine, which is now worked as a copper mine, is in the Mesasab province of Japan. It was opened 1,189 years ago.

**MISCELLANEOUS.****TREASURER'S REPORT.**To the Hon Board of County Commissioners, for Washoe County, Nevada:  
I herewith submit my report as County Treasurer for the quarter ending June 30, 1892, showing amount of receipts and disbursements for the quarter, also balance in the different funds July 1st, 1892:

Balance on April 1, 1892.....	\$92,986 11
RECEIPTS.	
Received during month of April, 1892.....	\$2,282 19

## WALL STREET TRIUMPHANT.

The forces of the people and the cohorts of Wall street met yesterday in battle array in the House of Representatives on the great financial issue of the day, the remonetization of silver, the money of the masses. On the side of the people were nearly all the Western and Southern Democrats, a few Western Republicans and the eight People's party members, while arrayed on the side of Wall street were Cleveland Democrats and Harrison Republicans in about equal numbers, and comprising a majority of the House.

The bill which the representatives of the masses were endeavoring to get through the House passed the Senate by a vote of twenty-nine to twenty-five, the rest of the Senators, thirty-four in number, not voting, many of them, though present, having been paired with absentees. It is known as the Stewart bill, and as amended and passed by the Senate reads as follows:

"That the owner of silver bullion may deposit the same at any mint of the United States to be coined for his benefit, and it shall be the duty of the proper officers, upon the terms and conditions which are provided by law for the deposit and coinage of gold, to coin such silver bullion into the standard dollars authorized by the Act of February 28, 1878, entitled 'An Act to authorize the coinage of the standard silver dollar and to restore its legal tender character,' and such coins shall be a legal tender for all debts and dues, public and private. The Act of July 14, 1890, entitled 'An Act directing the purchase of silver bullion and the issue of Treasury notes thereon, and for other purposes,' is hereby repealed. Provided, that the Secretary of the Treasury shall proceed to have coined all the silver bullion in the Treasury purchased with silver or coin certificates."

This bill simply provides that silver may be deposited and coined at any mint of the United States upon the terms and conditions provided by law for the deposit and coinage of gold. It merely restores silver to the equality which existed between it and gold as a money metal from the foundation of the Government to February 13th, 1878, when the Act demonetizing it was passed. It is charged that the passage of that Act cost European bondholders \$500,000, and it is claimed by many Senators and Representatives who were in Congress at the time that the demonetization clause was surreptitiously incorporated in the Act by Sherman, who had charge of the bill in the Senate.

For years after the passage of this infamous measure the party then in power admitted that it was wrong, but would never make a serious attempt to right the wrong, though in 1878, when the House passed a free coinage bill, the Senate made some amendments by passing the Standard Dollar Act over the veto of President Hayes.

Yesterday the opponents of the Stewart bill in the House shelved it until next Winter by a vote of 156 to 134, Harrison Republicans and Cleveland Democrats uniting and making common cause against the silver men, thus proving what has been alleged by the latter, that on the financial question of the day Wall street controls both the Republican and Democratic organizations.

## FALLING IN LINE.

General Weaver is sound on the silver question. Let us give him the unanimous vote of the State if silver is not remonetized. —Elko Independent.

Now, Mr. Independent, silver will not be remonetized before Congress adjourns. That proposition is settled beyond question, so take off your coat, roll up your sleeves and go to work with a will to make the vote for Weaver unanimous. The People's party is now the only hope of the silver men. Wall Street controls the Republican and Democratic organizations, and if we want to see the State reduced to a mere stock range with a few alfalfa ranches in the agricultural valleys we must ignore the old parties and make a united and determined struggle for silver.

It is gratifying to note that the Independent, which clung to party tenaciously, now understands the situation and advocates the election of the Silver party nominees.

Troops, State and Federal, to the number of 700, arrived at the Cesar d'Alene mines yesterday afternoon and last night.

The People's party and Democrats of Iowa have arranged for a fusion ticket. Weaver is to get the electoral vote of the State and the Democrats the State officers. A similar arrangement is being made in Minnesota, though Cleveland Democrats are bitterly opposed to it as they are in Kansas.

Ex-Speaker Reed led the Wall Street forces against the Silver bill in the House of Representatives, and Democrats who denounced him as a tyrant in the last Congress followed his leadership to the interest of gold men yesterday.

Judge Walter Q. Gresham is said to be a firm believer in the principles of the People's party and he will deliver a speech in advocacy of the election of Weaver and Field at Chicago.

## BY TELEGRAPH.

## News of Importance From Home and Abroad.

## THE SILVER BILL SHELVED.

Wall Street Victorious in the House. WASHINGTON, July 13.—The attendance in the House was larger this morning. The anti-silver Democrats were full of confidence and the Republicans were alert. The silver men were determined, but evidently had little hope of success. Their programme was suddenly changed this morning. They resolved to force the fighting and make the engagement decisive on the silver question; so they resolved to adopt the usual course of voting against the previous question on the adoption of the special rule of allowing the bill to be called up. If defeated it would be regarded as a test vote, if they succeeded in defeating the previous question their plan would be to offer an amendment to the rule permitting the amendment of the bill to correct objections made in caucuses to the cloture, so as to insure a final vote on the passage of the bill as amended.

The bill was opened by Catchings, Speaker Orlin's lieutenant, who requested from the Committee on Rules a resolution to make the Silver bill the special order of the day.

Ex-Speaker Reed, as the representative of the Republicans, was on his feet instantly at the conclusion of the reading of the motion by the Clerk, and moved to lay the motion on the table.

The Speaker declined to recognize Reed, ruling that Catchings had the floor. Reed insisted on his right to make a motion in advance of the one from Catchings, who was in control of the resolution, and disallowed the purpose of his motion, which was to kill the resolution and with it the Silver bill.

The Speaker maintained his position that Catchings had the floor, and Catchings yielded the floor to Chairman Bland of the Coinage Committee, who offered an amendment to the resolution, having for its object the pathway to an amendment to Stewart's bill to meet the alleged defects in it, and to apply the cloture rule to the bill.

Bland spoke fifteen minutes and was followed by Bartine of Nevada, the leading free silver Republican, who spoke in the same strain.

Reed delivered a philippic against the change of front by the Democratic party on free silver.

Reed was followed by Abner Taylor of Illinois against the bill, and Pearce of Tennessee and Culberson of Texas in favor.

Bland closed the debate. Then Catchings called for the previous question on his resolution.

On roll call the vote stood 163 to 128 in favor of ordering the previous question, and the clerk then proceeded to call the absentees.

On motion of Tracey the yeas and nays were ordered and the vote resulted in the defeat of the free coinage measure, the previous question being ordered, 163 yeas to 128 nays. Mr. Catchings was again recognized and moved an adoption of the resolution. This time the silver men voted "yes," as the defeat of Catchings' motion means death to free silver this session. The silver men are less than 10 votes stronger on the direct proposition, and a resolution reported by the Committee on rules was defeated by 136 yeas to 154 nays, a majority against the consideration of the Stewart Silver bill of 18.

This vote is the death of silver legislation at this session. The Stewart bill remains at the foot of a long roll of bills, sleeping the sleep of death on an overburdened calendar. Tracey of New York made a formal preliminary motion to reconsider the vote and to table the motion, and the House proceeded to consider other business.

SAN FRANCISCO, July 13.—The defeat of Senator Stewart's Free Coinage measure in the Lower House of Congress to-day was in many respects a surprise to many free silver advocates in this city. There are a large number of Nevada men here and without exception they were disappointed.

Ex-Senator M. D. Foley of Nevada expressed himself very decidedly. "The result of the action of the House to-day on silver," he said, "will cause Idaho, Montana and Colorado to put up an independent electoral ticket. These elections will be instructed to vote for some man for President who is in favor of at least the free coinage of all the American product of silver, if not of the free and unlimited coinage. Nevada has already done this. There is a possibility that these four States may hold the balance of power in the electoral college. Should the election be thrown in the House the action of these States will be all-important, as I believe they can dictate who the President shall be and no man will be named so far as this influence goes. All he and those who are his main supporters will grant justice to silver or something approaching it. The nominations at Minneapolis and Chicago were not satisfactory to delegates from silver States."

## Crushed by a Glacier.

PARIS, July 13.—The work of searching for the bodies of those who lost their lives in the disaster at St. Germain Les Bains yesterday is continued to-day. The bodies of those recovered are torn and mangled most horribly. In many cases the heads are torn from the bodies; on others arms and legs were cut off by the huge masses of ice that passed over them. Some are crushed out of all semblance to humanity.

When the glacier slid down into the Bonnant, on which the mountain stream St. Germain Les Bains is situated, the current was dammed and the water rose rapidly behind the huge wall of ice. Finally the pressure became so great that the dam was broken, and the roaring, grinding, crushing volume of water and tremendous masses of ice started down the ravine. Many were overtaken in sleep and instantly swept into the torrent and drowned, and the bodies afterward mutilated or crushed by the floating debris. Of the fifty-seven employees in the Baths only nine were saved alive.

At the hamlet of Blonassy, which was swept out of existence, thirty-five were killed.

The Striking Miners Will Fight to Death. BOSEA, Idaho, July 13.—Governor Wiley has issued a proclamation placing Shoshone county martial law. Word has been received that three companies of Federal troops from Montana have arrived at Milwaukie. The other troops have not been heard from. Adjutant General Curtis, who is in command of the State troops, went to Coeur d'Alene in advance of the outbreak. He has not been heard from to-day and it is feared he has fallen into the hands of the strikers. A dispatch to the Governor from Judge Heyburn at Spokane says the union men drove 133 non-union men out yesterday, firing on them and killing two. Superintendent Dickson of the Northern Pacific telegraphed the Governor that their tracks and bridges had been destroyed in the vicinity of Mullan and the wires had been cut. They will hold the county responsible. Another message to the Governor says that several non-union men have been blown up. The union men propose to fight the troops to death.

Quarantined on Account of Smallpox. VICTORIA, B. C., July 13.—The steamer City of Nanaimo, from Victoria, is quarantined in the bay by the Nanaimo authorities on account of the prevalence of smallpox at Victoria. Ninety-five passengers from Nanaimo were on the steamer when quarantined. Premier Davis has advised the Nanaimo authorities that their action is illegal. A writ of mandamus was granted by Chief Justice Bessie to-day commanding the Vancouver authorities not to prevent the landing of passengers from Victoria, the quarantine law affecting domestic ports having been complied with. Should opposition to landing of passengers continue at Vancouver, measures to suppress non-law will be taken. The disease here is well in hand and the scare is virtually over.

## YOUNG MACKAY APOLOGIZES.

He Pays Costs in a London Police Court.

A London dispatch says the case of Stewart vs. Mackay came up in the Westminster Police Court last Monday but was settled without resort to further legal measures. The principals were J. W. Mackay, son of the American Bonanza King, and Captain Honorable Randolph Stewart, an old army officer. Captain Stewart claimed that young Mackay had sent him a letter couched in menacing terms. When the name of the defendant was called Mackay's counsel informed the Court that his client, who was in Paris, had agreed to make ample apology to Captain Stewart for the offensive remarks in his letter, and pay the costs of the case. This offer was accepted by Captain Stewart, the summons withdrawn and the suit declared closed.

The nature of the threats in the letter was not revealed. Efforts to obtain a reliable explanation of the difficulty between the men were unsuccessful.

The Sierra Nevada Tourist says John Sullivan, a fisherman at Carmichael Springs, caught a fine trout last Saturday morning. He says it is the largest trout he ever caught in the lake and he has been fishing in Lake Tahoe twelve years. The fish measured thirty inches in length, eight inches in width, five inches in thickness, and weighed over thirteen pounds. It was packed and shipped to Stewart Mackay, Truckee.

The Elko Independent learns that a vote taken for President last week at Carlin, regulated: Weaver, 40; Cleveland and Harrison combined, 10.

Deaths in January. It has often been noticed at the beginning of January the death is announced of a number of prominent men. The reason is probably found in the fact that that great men are more prone to die in January than at any other time of the year, but that the weather in that month is unsettled, and consequently hard on the constitution alike of great and humble. Great men are only human after all, and a great man physically weakened by hard work or disease is just as likely to die from a change of weather as though he were a day laborer.

The mortality tables show that the month of January and the first month of exceedingly hot weather in the summer are more fatal than any other time of the year, and the great must take their chances with other people. —St. Louis Globe-Democrat.

Labouchere's Narrow Escape. Labouchere was in Mexico during the rebellion, and he thought he might serve humanity by secretly giving both "belligere" good advice. One night, as he approached the tent of one of the two generals, he heard the voices of these rival pretenders in conversation. Creeping close to the canvas he listened, and discovered that they had agreed upon a truce in order to hang him in the morning as an example to both armies. In the morning, however, this misander stood mutual friend had naturally disappeared. —Cor. New York World.

## Number of People Since Adam.

Did you ever make a calculation of the probable number of people that have inhabited our globe since the beginning of time? No doubt you will say that such calculations involve a loss of time, and are after all barren of results. But let us take a few minutes' time (and approximate, with a certain degree of accuracy, the number of souls that have been "cashed" into this wicked world since the time when it was "not good for Adam to be alone."

At the present time it is believed that there are 1,400,000,000 human beings on the globe; but let us suppose that there has been but an average of 500,000,000 living at any one time since the creation. Next, to give room for any possible doubt, we will put the average length of life at fifty years. (It may have been much longer than that 5,000 years ago, but has been much shorter for the last 1,000 years.) With the average length of life as above, we have had two generations of 500,000,000 each every century for the past 1,000 years.

Taking this for granted this globe has had 69,087,848,387,075,286 human inhabitants since the beginning of time. To even bury this vast number the whole landed surface of the globe, every inch of it, would have to be dug over 120 times! —Philadelphia Press.

How a Chameleon Looks. Upon a crimson cloth the chameleon becomes almost crimson; move it upon a gray surface and the bright tints will quickly subside. But at night, whether disturbed or not, it invariably assumes its palest tints. Two which I caught in the Cape Town garden, which were of a very brilliant metallic green, were splendidly decorated. On the back or sides, sometimes saddlewise, and sometimes lengthwise, were slashes of red. The markings vary in the individuals. The crest and decorations on the head and back are like fretwork, the whole body and limbs are dotted with very fine white or tubercles like shagreen, and when angry all these distinctive features are exaggerated, the gills and crest are swelled, and the skin of the chin is puffed out so as to show white stripes, while the creature opens its mouth, displaying the yellow, fleshy interior, and closing its teeth on your finger should you provoke it to do so. —Cor. Forest and Stream.

How the Cobra Gives Warning. The most dangerous reptiles of India and Africa are the cobras. No snakes, not even rattlesnakes, are more dreaded, and with reason. As the rattlesnake warns the ear by its significant "rattle," so the cobras warn the eye by the mode in which they expand the upper part of the body when irritated. This expansion is produced by a sudden movement of the ribs of that region of the body. Usually they hold their head, but the animal, when irritated, makes them stand out at right angles to the body, and so, of course, forces outward the skin which covers them. Thus the neck, or part just behind the head, becomes greatly expanded and flattened, as it also does, though in a less degree, in the Australian blacksnake. This expansion is called a hood, and so the animals are called hooded snakes. In some of them there is on the back of the hood a dark mark, something like a pair of spectacles, and they have therefore been called spectacle snakes. —Quarterly Review.

How Hawthorne Wrote. We never think of local color in connection with Hawthorne. Apparently he didn't need to put it on. Perhaps he would not have understood about it. He might have thought that the counterpart of the literary term (local color) applied socially would refer to the women who paint, the term has such an artificial sound. One has an idea of a colored photograph, the local color is not a part of the substance, but is imposed. Hawthorne was not conscious of any necessity of giving local color to his creations. He wrote of that into which he was born, and his creations, even when they were in foreign settings, glowed with that internal personality which is never counterfeited by veneer. —Charles Dudley Warner in Harper's.

Definition of a Journalist. "A man of literature compelled by circumstances to be also a man of business." That is the definition of a journalist, given by Mr. Sala. It is a good enough definition in its way, though it cannot be considered as invariably accurate. There are a good many so-called journalists who are certainly not "men of literature," and a good many more, whose claim to the title of "journalist" is unquestioned, who are certainly not "men of business." —London Globe.

BREVITIES.

For inward or outward application use Lightning Flind.

Gentlemen use Winterville after shaving and find it perfect.

The weather is cooler than it usually is at this season of the year.

Charles A. Jones, the lawyer, returned from California night before last.

For painless Dental operations go to Porter Bros., Commercial Row.

The aggregate loss of property from fire in the United States last year was \$140,000,000.

Plumbing, tinning and pipe work done at the lowest possible prices by Lange & Schmitt.

Professor Bing, State Superintendent of Public Instruction, arrived from the Capital last evening.

Bargains in cook stoves, heating stoves, ranges and house furnishing goods at Lange & Schmitt.

Judge Currier, who went to Omaha as a delegate to the People's party Convention returned last night.

Boston's new directory contains 205,35 names, and Brooklyn's new directory lacks just 149 of 200,000 names.

Ed. Wright, who supervises bridges and buildings on the O. P. R. R. from Verdi to Ogden, arrived in town last night.

The bosses of the old parties are as mad as wet hens because the silver men persist in doing things their own way.

Emerald Bay, Lake Tahoe. Fine fishing and hunting; free boating and bathing; first class table. Address, J. M. Smith, 201

Pat Keating is busy filling orders for Reno raised raspberries. He has a very fine variety of the berry and an abundant crop.

The river still continues to raise in the afternoon, caused by opening the head-gates near Truckee for the purpose of floating logs to the mills.

S. A. Hamlin has started up the State Line Mill for the summer run. He has disposed of the greater part of the lumber he sawed last season.

The action of the golding Democrats and Republicans in opposing the silver bill in the House is driving everybody but the old moon-backs to the silver party.

Mrs. Henry Morris and children have gone to San Francisco for a two-months' visit. They were accompanied by Mrs. Shire of Carson, Mrs. Morris' mother.

A fine supper with ice cream will be served at the residence of Mrs. John Douglas this Thursday afternoon, July 14th, from 4:30 to 7:30 o'clock, for 25 cents.

Emrich, of the Nevada Cash Dry Goods and Carpet House, will give ten per cent discount on all cash purchases for thirty days. Goods will be sold at the lowest possible prices.

Naches, the Plute Chief is endeavoring to get Bungy Jim and two squaws out of State Prison. They were convicted of killing a witch and sentenced to State Prison for ten years.

C. A. Buckley, the great San Francisco boss, passed west last night. He was indicted by the Grand Jury which the Supreme Court decided was irregularly drawn.

W. M. Van Baren, who arrived from Weber Lake yesterday, reports A. C. Bragg of the Gazette seriously ill at that place with catarrh of the stomach. He was not able to leave his bed yesterday.

The total amount of the speculations of Collins and Dare of the defunct California National Bank at San Diego is placed at \$1,200,000. Collins, it will be remembered, committed suicide and Dare made his escape to Italy.

Dr. Mullen, while at State Line a few days ago, accidentally tipped a bench over, which fell on his foot, breaking the little toe, but as he is a hard man to down, he continues to get around with the assistance of a stout cane.

George Cutting has returned from Lovelock, where he spent some weeks. He says there will be a hundred thousand bushels of wheat raised there this season, and there is water enough in the Humboldt to irrigate the whole of Big Meadows.

S. A. Hamlin of the State Line Mill is having the material for a boarding house, office and other buildings for the Oreana mines, framed and ready to put together. The material will be shipped to Oreana by rail and thence hauled by teams to its destination.

Walter Peacock, a brother-in-law of R. B. Hawcroft, was run over and killed at Sacramento, yesterday afternoon. Mr. Hawcroft, who is one of the Journal's typographical corps, left for Sacramento last night in response to a telegram announcing the death of Mr. Peacock.

Plans have been completed for another great irrigating canal with reservoirs in the Santa Cruz Valley, Arizona. It will be 70 miles long and 30 feet wide at the bottom and will cost about \$1,200,000. It is expected to reclaim 900,000 acres which will produce fine fruits for Eastern markets.

The party which has been making a preliminary survey for the proposed extension of the N.-O.-O. returned last evening. It was under the direction of L. F. Warner, and consisted of Chief Warner, J. R. Elliott, W. T. Moran, F. Shearer, Lyman Cook, Archie Kline, George Tesland, Tom Cook and Charles Wagoner. The party went from Amadee north to Lukely, a village on the south fork of Pitt river in Modoc county, California.

THE SILVER BILL SHELVED.

A Signal Victory for Wall Street.

Wealth yesterday gained another signal victory in the irrepressible conflict between aristocracy and democracy; between the rich and the poor, the creditor and the debtor; the people and the lords of dollars. By a vote of 154 to 136 the silver bill was shelved in the House.

What are the spoils of that bloodless triumph for aristocracy? What are the burdens that Democracy has lost in defeat? Only these: tighter on the former draw its clutch upon the happiness and prosperity of the latter. More mortgages on the homes of the people can the creditor foreclose; more men driven into bankruptcy; more suicides caused; more ignorance created; more despair superinduced.

It is a conquest in the domain of happy homes and loving firesides for poverty and wretchedness. A victory to make the power of gold omnipotent. A triumph for the purpose that Gould, Vanderbilt, Carnegie, Astor, Sage and all shylocks may achieve gains under cover of the law, and through the subtle alchemy of currency contraction which they have not earned, and which labor with its calloused hands must toil to make for them unpaid. It is a victory against progress.

What effect will it have on Nevada? Only this: It will close the mines and still further depopulate the State. It will make burrows for moles where eagles once stood.

Who helped achieve this victory? The tools of the gold kings; the "straight party" men, whose judgment were guided by party platforms, and dollars. Yes, and two others; the strong influence of Benjamin Harrison, the golden automaton at the head of this Government which sneezes when Wall Street and London takes golden snuff, and by the stuffed prophet and apostle of the heraldry of dollars, Grover Cleveland.

The battle for free coinage will not down and as an issue it can only be conquered by granting it. There are two ways of aiding the cause of the white metal, one that common sense dictates; one that the Gazette, in its illimitable wisdom points out. Voters of Nevada we commend to your intelligence the last. Therefore to further the interests of free coinage, vote for the nominee of the party that points with pride to the past and to the revision of the tariff for all the rest of recorded time, or, in the spirit of the law, to love your enemies, vote, if you desire, for the nominee of the malodorous corpse of that party which lived way back in that time when the Government was of the people, by the people and for the people, but which now is the exponent of straddled issues, and the tool of the same master as its great opponent. Vote for either of these if you want free coinage. The way to get what you want is to help the enemies. Such is the new law, the "straight party" logic by which the rotary periodical of Harrison and Cleveland has overruled the dictates of common sense and reason.

JUDGE BEATTY'S DECISION.

His Ruling in the Milners' Union Injunction Case.

The opinion of Judge Beatty of the United States District Court of Idaho in the injunction case against the Camr J. Alene Miners' Union is as follows: "A wrong exists; rights have been infringed on. Unoffending citizens have been maltreated. That the National Court has original jurisdiction in actions of this class cannot be questioned, but the important question is whether a Court of Chancery can exercise its power to restrain further commission of the acts herein complained of. The unrestrained execution of the designs which it would seem from the record in this case, the defendants entertain, would result unfortunately. To carry to their logical conclusion the owner of the property would lose its control and management. It would be worked by such laborers during such hours, at such wages and under such obligations as the laborers themselves might direct. Under such rule its possession would become onerous. The enterprise of employing labor would cease, and instead of activity and plenty idleness and want would follow.

"Whatever enthusiasts may hope for in this country every owner of property may work it as he will. Associations of laboring men into organizations for social enjoyment, mental improvement, for protection of their interests and amelioration of their condition is not condemned either by the people or the law. On the contrary, it is their right to do so and they have the sympathy of all classes in their efforts to advance their interests by lawful means.

FOR WEAVER AND FIELD.

Paradise Valley identifies the Nominees of the People's Party.

A correspondent of the Silver State writes: A grand ratification meeting of the Oreana nominees is being held in Paradise this evening (July 9th) booming anvils, blazing bonfires and fireworks are the order of the evening. Paradise Silver League Hall is finely illuminated; the business houses and residences are also illuminated and decorated with the National colors. The people from the surrounding country are in to participate in the meeting. Many ladies joined and greatly aided in making the affair a grand success. At midnight the meeting adjourned with three rousing cheers for Weaver and Field.

The Wilber Company.

The Wilber Company was again greeted last night with a large audience to witness the Lights of London. The several characters were equally as well sustained as those of the two previous evenings. The scenery carried by the company added much to the effect of the play. The bridge scene was particularly realistic. To prove that the play was good and carried the audience with it, all that was necessary was to hear the outbursts of applause that greeted each thrilling situation.

To-night will be produced "Emerald," a play written by the author of "Little Lord Fontenoy," which will undoubtedly be greeted with another large house.

GAME PRESERVES AND MORTGAGES

What Interest Paid in the West is Used for the East.

Chicago Graphic.

A number of wealthy New York sportsmen have acquired 104,000 acres of land by purchase and 75,000 by lease for the purpose of enclosing the same as a game preserve. While this state of affairs points out the rapid accumulation of wealth in the East it actualizes at the same time the contrast in the conditions of American capitalists and the American producers.

In the far West the farmers are fighting a perennial struggle with mortgages. In the East it actualizes at the same time the contrast in the conditions of American capitalists and the American producers. In the far West the farmers are fighting a perennial struggle with mortgages. In the East it actualizes at the same time the contrast in the conditions of American capitalists and the American producers.

American newspapers and campaign orators are in the habit of speaking of the soil as the common heritage of the people. They forget that slowly but surely a system of land ownership has grown up in this country which embodies all that is bad in European land laws. Much is said against trusts of various sorts, but very little attention has thus far been paid to the land monopoly which threatens to denationalize the United States.

Purchasers like that made by the New York pot hunters are, at the present stage of events, not an unmixed evil. They open the eyes of the producers and tillers of the soil, and aid them in the proper study of economic problems upon whose solution depends the salvation of the country. One need not be a clammy crier to deplore the pusillite aggressiveness of our would-be aristocracy. A disinterested observer to be found in all of our large cities and the business sgrouter of our platform can find much to discourage him without conjuring up pictures of the horrors which must inevitably follow the day of reckoning between the arrogant spend-thrifts and their victims. It is not yet too late to avoid a catastrophe. The protests of the laborer and farmer are beginning to be heard in New York as well as on the plains of Kansas. But unless they are headed the anti-seed-fog-hunters and snipe-shooting dukes of American myth will have to regret their present enjoyment of privileges clothed from a patent notion.

Board of Pardons.

The Tribune of last evening says the following additional cases have been acted on by the Board of Pardons:

Man Town, a Chinaman in for murder; was pardoned with the understanding that he immediately leave the country.

William Thomas, sent from Gold Hill some six years ago for incest; pardon denied.

T. F. Keith, sent from Esmeralda for murder in the second degree; denied.

Wm. Diamond, from Humboldt for robbery; pardoned.

Frank McIntyre, murder in first degree.

It is intended to file articles of incorporation of the San Francisco and Great Salt Lake Railroad in Nevada next week. The road is almost certain to be built in the near future, but the exact route has not yet been made public.

General Powning returned yesterday from Watsonville, California.

Notice.

C. H. Painter will take charge of the Riverside Gallery from this date.

Ventilation.

Not the politician's sort, but the fresh air you need. Health and comfort often suffer for this kind of ventilation. Never sleep in a poorly ventilated room. You wake up unrefreshed, out of sorts, and bilious. Perhaps you cannot improve the ventilation, but you can take Simons Liver Regulator for that torpid liver, to keep it active against the ill effects of a close atmosphere which causes that languid feeling.

INSIST ON HAVING

## Dr. Price's Cream Baking Powder,

TAKE NO OTHER.

It Contains Neither Alum, Ammonia, or Any Other Adulterant.

Richardson's "Diseases of Modern Life"—The action of ammonia on the body is that of an irritant and it tends to hold the blood in a state of fluidity. It also interferes with the process of oxidation of organic matter so that it becomes an antiseptic, and it rapidly decomposes that allotropic condition of oxygen which is called ozone. Thus ammonia present in the atmosphere, daily respired by living beings, is injurious and we see its effects in the pallor and feebleness of many who dwell in houses in the air of which ammonia is always present—houses over stables, for example, or in close proximity to decomposing organic refuse.

Liebig the celebrated chemist, says of alum, that it is very apt to disorder the stomach and to occasion acidity and dyspepsia.

FIFTY-CENT COLUMN.

All classes of legitimate advertisements not exceeding the lines, inserted in this column at 50 Cents per Week.

Maternity Notice.

Broke into my enclosure Thursday, July 7th, an iron gray colt, about three years old, branded double circle on left shoulder and appear cut on left ear. The owner will please call, prove property and pay charges. M. HAWCROFT.

## Beautiful Hands!

Are what every lady is anxious to possess. Now, there is a secret that has never been revealed to the world, and that is, the sure way to possess these hands of beauty. Use **MOLLINE**. A proved success. This discovery was made by a graduate of London England college and a learned chemist. The horrors of the kitchen is no more a worry to the housewife. No matter how stained and grimy the hands may be, one application of the wonderful **MOLLINE** will leave them as soft and white as if no kitchen work had been done. For sale by all druggists in large bottles, 50 cents.

Give **MOLLINE** one trial and you will never be without it.

For sale by Wm. Pinniger.

## EROS COMES TO STAY.

Once a fowler, young and ardent. To the quiet greenwood came. Full of skill was he and heartiness. In pursuit of feathered game. And betimes he chanced to see Eros perching in a tree.

"What strange bird is that, I wonder?" Thought the youth, and up he sprang. Eros, chuckling at the blunder. Gaily scampered here and there. Do his best, the simple doid. Could not snare the agile bird.

Blubbering, to his aged master Went the fowler in dismay. And confided his disaster. With that caution bird that darts: "Master, hast thou ever heard Of so ill disposed a bird?"

"Heard of him? Ah, most truly!" Quoth the master with a smile. "And thou, too, shall know him duly. 'Tis not a bird, but a mischievous elf. And old Eros will not fly From thy presence by and by."

"For when thou art somewhat older," Said the same Eros then didst see. More familiar grown and bolder. Shall become acquainted with thee. And when Eros comes to stay. Mark my word, he'll come to stay."

—Eugene Field in Chicago News.

The Blood Circulates Rapidly.

Medical workers have made many curious experiments, but none more wonderful than that by which they learned the exact time required for the blood to make an entire trip through the system, which all students of physiology know means a complete circulation through the lungs, veins, arteries and general capillary arrangements.

Professors Dalton, Hering, Poissonelle, Matteucci and Blake have been the chief investigators in this line, the first named having become more eminent in this particular branch of research from having the experience of the others to fortify himself with. All the old school anatomists believed that a considerable time elapsed, say from three to nine minutes, from the time when the blood left the right side of the heart, traversed the whole system and then again returned to the starting point; Dalton has shown that the time is much shorter than was formerly generally supposed.

He says: "Dozens of carefully tabulated tests of this somewhat extraordinary subject shows that the blood of man makes a complete circulation one every fifteen to twenty-five seconds, according to the physical conditions of the subject experimented upon."—St. Louis Republic.

Search Lights versus Torpedo Boats.

It is stated that one of the most effective means of protecting a ship in these days of torpedoes (the grouping together of a number of stationary search lights, each illuminating its own section so that the ship is surrounded by an unbroken circle of light), is to be adopted in the new American warships.

This has been suggested by a very pronounced defect in the usual search light practice. In order to afford sufficient time for a casual examination of the water's surface at points removed from the ship, the beam of light must be revolved very slowly, and hence during a great portion of the time any particular section of the water is left in darkness. As it takes only five minutes for a torpedo boat to run a distance of two miles, it will be seen that the conditions are all in favor of the attacking force. Before the revolution of the search light is completed there is plenty of time for the torpedo boat to run up and discharge her deadly weapons.—New York Telegram.

Worth a Thousand Dollars

Every child born into a family is thought to be worth "a thousand dollars" to the parents. Why then should they not be cared for from infancy to maturity? Keep the mouth and teeth right with SOZO DONT, and you will start them right.

Women in Examination.

The last report of the civil service commission presents interesting data for the contemplation of the pessimists and conservatives regarding woman's status in the industrial world. In the examinations for copyist work half the men failed, and five out of every six women passed. For clerkships in the classified departmental service every third man failed, but three women out of four passed. In the higher technical departments women scored another triumph in the proportion that passed. Of the 8,475 men that were examined, 1,959 passed. Among 1,778 women candidates, 1,417 stood the test, and the women did twice as well as the men. However, in the matter of appointments the balance of favor was of course with the men.

A New Saddle.

A new variety of woman's saddle has made its appearance in England. The pommel is much wider than those of old. Much greater pressure is given to the thigh, and a surer and easier seat is the result from it. Many women have the habit of following the hounds have testified to the advantage of the change. The saddle weighs no more than one of the old style.

A Canning Child.

"Oh, Tom, the baby is so sweet! To day he took off his shoe and threw it in the fire, and when I told him that he was a bad, bad boy he only said 'Nah.'"

"Nah, eh? Well, what do you think I'm made of—money? That's the second time he's lost in a week."

"Oh, no, dear; it was the mate of the one he took to pieces."

"Oh, that's different—isn't he cunning?"—Harper's Bazar.

Old Nursery Favorites.

There was Tom, the Son of the Piper, Jack Spar, and Merry King Cole, And the Three Wise Men of Gotham, Who went to see a lowly;

The woman who rode on a broomstick, And swept the cobwebs sky, And the boy who sat in the corner, Eating his Christmas pie.

These were some of the old favorites, but they have been supplanted by the "Pansy" and "Chatterbox" stories, "Little Lord Fauntleroy," and "Five Little Peppers." The Old fashioned pills and physics have been superseded and wisely so, by Pierce's Purgative Pills, a mild, harmless and effective cathartic. They are pleasant to take—so gentle in their action that the most delicate child can take them, yet so effective that they will cure the most obstinate cases of constipation, stomach, liver and bowel troubles. They should be in every nursery. As a gentle laxative, only one for a dose.

## "August Flower"

Perhaps you do not believe these statements concerning Green's August Flower. Well, we can't make you. We can't force conviction into your head or medicine into your throat. We don't want to. The money is yours, and the misery is yours; and until you are willing to believe, and spend the one for the relief of the other, they will stay so. John H. Foster, 1122 Brown Street, Philadelphia, says:

"My wife is a little Scotch woman, thirty years of age and of a naturally delicate disposition. For five or six years past she has been suffering from Dyspepsia. She became so bad at last that she could not sit down to a meal but she had to vomit it as soon as she had eaten it. Two bottles of your August Flower have cured her, after many doctors failed. She can now eat anything, and enjoy it; and as for Dyspepsia, she does not know that she ever had it."

Every Meal, down to a meal but she had to vomit it

## How Opium Is Gathered.

It is a sort of garden cultivation, the poppy plants being grown in little squares or beds intersected by tiny water channels for irrigation wherever this is possible. The growth of the plants is carefully tended, and at length the time comes when they burst out into flower, and the fields look like a sheet of silver as the white petals of the flowers glisten in the morning dew.

These beautiful petals are the first produce of the crop, for the women and children of the cultivators' families come forth and pick them off one by one and carefully dry them, so that they may serve afterward as the covering of the manufactured cakes of opium. Then the poppies, with their bare capsule heads, remain standing in the open field until it is considered that they are ripe for lancing. The cultivators then come forth in the evening, and with an implement not unlike the handle of a cupping instrument, they scarify the capsule on its sides with deep incisions, that the juice may exude.

In the early morning the cultivators reappear with a scraping knife and their earthenware pots, and they scrape off the exuded juice and collect it in their pots. And this is crude opium.—Blackwood's Magazine.

A Tragic Kindergarten Episode.

A certain kindergarten is blessed with the attendance of a very original youth named Richard. He is a very honest little fellow and highly respected by his parents, but the other afternoon when he came home he acknowledged frankly to his mother that a punishment had been inflicted upon him at the kindergarten.

"Why, what have you done?" "Well, you see," he answered, "Johnny and I got tired of being good, and we made up our minds that we would just get our heads together and holler out the very naughtiest word we could think of, both together."

The mother was inexpressibly shocked. Johnny was another very nice and well bred boy. But she managed to ask: "Well, what did you say?" "We just screamed out 'Bedbug' as loud as we could!"

Probably this tragic episode has never had its duplicate in the history of kindergarten.—Boston Transcript.

A Snake That Is Found in Many Places.

The common snake, which bears the scientific name of Tropidonotus natrix, is one species of a genus (Tropidonotus) which extends over Europe and North America, and from northern Asia to north Australia, there being seven or eight Indian species alone. Our common snake may serve as an example of the largest family into which serpents are divided—the family Colubridae—of which there are upward of 165 species in India alone. This family contains most of the harmless snakes, and it is also illustrated by a small snake, Cornelia australis, which some years ago was discovered to be an inhabitant of Dorsetshire and Hampshire. The Cornelia feeds exclusively on lizards, slow worms and small snakes. Though harmless, it will bite.—Quarterly Review.

The First False Hair.

In very early days, as now, the hair was sometimes thin and it had to be eked out in various ways to make believe that nature had been spendthrift to all alike. About the first description extant of woman's hair speaks of "plaited locks," known as "Gretchen braids" to us. To make these braids seem longer, silk the color of the hair was braided in. Then they took to putting the braids in cases of silk, elongating them with all sorts of stuff till they looked like umbrellas in covers. The Chinese pigtail is a modification of this style.—Washington Star.

Dinner Table Amenities.

Young Van Sprawl—I believe in being above board in all that I do. Old De Goutte—Then I wish you would stop kicking me under the table.—Kate Field's Washington.

The Roumanian has, in every walk in life, a fierce and savage pride which causes him to abhor the idea of medicine and surgery, and to consider the loss of a limb as terrible as that of life itself.

NO OTHER Sarsaparilla possesses the Combination, Proportion and Process which makes HOOD'S Sarsaparilla Peculiar to Itself.

STOCKHOLDERS' MEETING.

NOTICE IS HEREBY GIVEN THAT THE annual meeting of the stockholders of the Nevada State Bank, for the year ending December 31, 1892, will be held at 10 o'clock A. M. at its office, in Block P, in Reno, Nevada, on Monday, July 11, 1893.

At 10 o'clock P. M. for the election of five Trustees for said Company for the ensuing year, and to transact such other business of said Company as may lawfully come before said meeting.

J. F. CONDON, Secretary.
